

- (1) What are the major factors in your decision to collect and share network data?**
- (2) Do you feel like you have a strong understanding of the risks (legal, contractual, etc.) of sharing network data?**
- (3) Do you feel like you have a strong understanding of the available controls for mitigating those risks (both technical and policy)?**
- (4) What (if anything) would motivate you to collect and share more network data with the research and operational community?**
- (5) What should a Best Practices Guide include to improve data sharing?**
